

Mathematics Composites

Mathematics (Calculations & Reasoning)

Math Fluency

Subtests

Tasks

Math Problem Solving

- Ability to identify what is being asked in the problem
- Choose and implement a correct solution
- Apply math to real-world, practical problems

- Solve math word problems including, but not limited to, basic operations, time, money, and graphical interpretation

Numerical Operations

- Solve math questions involving addition, subtraction, multiplication, division, geometry, and algebra

Math Fluency – addition

- Speed and automaticity

- Solve as many simple problems as possible within one minute

Math Fluency – subtraction

- Speed and automaticity

- Solve as many simple problems as possible within one minute

Math Fluency – multiplication

- Speed and automaticity

- Solve as many simple problems as possible within one minute
